

Introduction

#AWSvsGCP

- Hi, I'm Matthew Evan Eichler and I have a freelancing company here in Amsterdam, Netherlands called Aventine Solutions.
- I've been working as a Software Developer for decades now and have been focussing on DevOps with Cloud Infrastructure the last 5 years.
- It occurred to me maybe is the time to start sharing some of my experiences with some short presentations.
- I thought a simple place to start would be to compare Best Practices in Amazon and Google Cloud including some Code Samples ... plus maybe touch on some Agile Concepts to help out others in the DevOps Role.

Are you experiencing pain?

- Do you think this is a good idea?
- Would this help you?
